## ENVIRONMENTAL POLICY

As Diler Iron & Steel and Yazıcı Iron & Steel (DNA), we recognize the protection of the environment and the efficient use of natural resources as a fundamental responsibilities in ensuring a sustainable future. In this regard, we hereby commit to adhering to the following principles:

- By evaluating the environmental impacts of our activities, products, and services, we aim to minimize negative effects on the environment and protect our natural surroundings,
- Setting Environmental Management System (EMS) objectives, ensuring continuous improvement, and establishing a transparent framework in this regard,
- Ensuring that environmental impact assessments for all investments and projects based on the best available techniques,
- Promoting sustainable resource use and reducing energy and water consumption.
- Developing and implementing environmentally friendly production methods by utilizing responsible raw materials,
- Developing strategies and projects to reduce greenhouse gas emissions in order to combat climate change,
- Promoting recycling and reuse practices that align with the zero waste goal and circular economy,
- Educating and raising awareness of our employees and stakeholders on environmental and sustainability issues,
- Taking necessary measures to minimize potential damage in case of emergency environmental situations,
- Ensuring full compliance with all national and international laws, regulations, and standards related to the environment,
- Encouraging our suppliers and contractors to align with our environmental policy and proactively manage environmental risks,
- Minimizing negative impacts on biodiversity and ecosystem services by respecting protected areas,
- Establishing open communication with all stakeholders affected by our operations,

We will share this policy with all our employees and stakeholders and continuously improve the effectiveness of our environmental management system.
